ALEXANDER ZHIGANOV

AI Solutions Specialist · AI Product Builder · Systems & Automation Architect

zhiganovalex@gmail.com · **linkedin.com/in/zhiganovsasha** · **studio-shum.art**

Open to Relocation to UAE (Dubai, Abu Dhabi, Sharjah) · On-Site, Hybrid & Global Remote

SUMMARY

AI-Native Product Builder and Solutions Specialist with a proven track record of architecting and deploying functional AI tools, operational automations, and enterprise knowledge systems. Bridges business workflows with practical AI technology by defining system architecture, designing data flows, and directing advanced AI developer agents (Claude Code, OpenAI Codex, Antigravity) to build and deploy verified software rapidly. Co-founder at **SHUM**, where he built production AI systems: an operational Telegram assistant integrating Whisper voice recognition, Docling document processing, and Google Workspace sync, alongside an enterprise RAG knowledge engine (ChromaDB, hybrid search, custom MCP server). Backed by generative AI pipeline experience (Stability AI Lab 2024, ComfyUI). Relocating to the UAE; targeting AI Solutions Specialist, AI Product Builder, or Forward Deployed AI roles on-site or full remote.

SKILLS & CAPABILITIES

AI Product & Systems Architecture: AI-Native Product Building · **Agentic Workflow Orchestration** (Claude Code, Codex, Antigravity) · Architecture & Data Flow Design · Rapid Hypothesis Testing & MVP Prototyping · Technical Product Ownership

AI & Data Infrastructure: Retrieval-Augmented Generation (RAG) · **ChromaDB Vector Store** · **Hybrid Search** (Dense Embeddings + Keyword Retrieval) · Model Context Protocol (MCP) Server Integration · Whisper Speech-to-Text · Docling PDF Extraction

Workflow Automation & Backend: Telegram Bot API (aiogram) · **Webhook Integration Pipelines** · Google Calendar & Sheets API Sync · AI Token & Budget Tracking · Workflow Automation (n8n, Make logic) · Docker Containerization · Caddy Web Server

Generative AI & Languages: Stability AI Lab (2024) · ComfyUI Node Workflows · Stable Diffusion · **English (B2, professional working proficiency: technical discovery, demos, stakeholder communication)** · Russian (Native)

PROFESSIONAL EXPERIENCE

SHUM | Co-founder & Head of AI Product & Systems *2023 – Present*

- Architected and deployed **SHUM Telegram Assistant**, a live production operations bot automating studio project intake, voice memo transcription (Whisper), document parsing (Docling), and real-time AI token cost accounting.
- Engineered **SHUM Brain**, an internal Retrieval-Augmented Generation (RAG) knowledge platform built with ChromaDB, hybrid search, and a custom Model Context Protocol (MCP) server connected to AI coding agents.
- Built automated lead ingestion webhooks and deployment pipelines connecting the studio web platform directly to operational chat groups and Google Workspace.
- Architected custom generative media pipelines (ComfyUI, Stable Diffusion, Runway) delivering visuals for **40+ international exhibitions in 7 countries**, including the **Sharjah Light Festival 2026** commission (293-meter projection mapping).
- Directs AI-assisted rapid prototyping cycles: defining user stories, conducting end-to-end testing, catching workflow edge cases, and guiding product evolution without reliance on slow traditional development sprints.

Media Production Group | Creative Technology & Operations Lead *2022 – 2023*

- Coordinated digital production pipelines, technical asset handoffs, and schedule tracking for commercial media campaigns and live event content.
- Streamlined cross-functional communication between technical specialists, creative teams, and clients, establishing structured tracking templates.

Independent Practice | Digital Media & AI Workflow Consultant *2019 – 2022*

- Advised media studios and event teams on workflow digitization, digital asset management, and early adoption of generative AI tools (active since 2021).
- Delivered interactive installations and digital media showcases across festival venues, managing technical coordination and hardware integration.

PRODUCTION SYSTEMS & CASE STUDIES

SHUM Telegram Assistant : Automated Studio Operations Bot *FastAPI · Whisper · Docling · Google APIs · Docker*

- Production operations assistant handling multi-format inputs: voice messages are transcribed via Whisper, PDF briefs are parsed via Docling, and extracted tasks are automatically scheduled in Google Calendar and logged in Google Sheets.

SHUM Brain : Enterprise RAG & Knowledge Base *ChromaDB · MCP Server · Hybrid Search · Markdown Wiki*

- Private knowledge engine indexing historical studio documentation and chat records. Features hybrid vector and keyword retrieval with a custom MCP server, allowing AI coding tools to reference internal context directly during development.

The Rock of History : Sharjah Light Festival 2026 [View] *Commissioned Artist & Technical Pipeline Lead*

- Delivered technical asset pipelines for a 10-minute projection mapping show across a 293-meter natural rock face at Al Rafisah Dam, combining custom generative workflows with archaeological research from the Mleiha Archaeological Centre.

EDUCATION & TRAINING

Moscow State Institute of Culture (MGIK)
Specialist Degree in Film, Photography & Video Production
2015 – 2021

Stability AI Innovation Lab
Creative Applications of AI & Generative Workflows
2024
